

CS-UY 1134 MATERIAL

NYU TANDON SCHOOL OF ENGINEERING

DESCRIPTION

This repository contains Prof. **Sebastián Romero Cruz**'s CS 1134 lecture notes and practice problems.

Note: Use and/or distribution of this material outside of this class is legally restricted by **university policy**. If you want to use it for any reason other than as a study resource, send me an **email** about it with the subject line `CS1134 Repo Use Request`.

LECTURES

To be released every Monday and Wednesday before lecture.

ALGORITHMS

1. Python In Memoriam: *Lists and Strings* (Intro Slideshow)
2. Python In Memoriam: *Copying* (Zoom Lecture Notes)
3. Iterators and Generators
4. Algorithm Correctness
5. Asymptotic Analysis
6. Searching Algorithms
7. Amortised Analysis
8. `ArrayList`
9. Recursion
10. Sorting Algorithms

DATA STRUCTURES

- .1. **Stacks**
.....
- .2. **Queues**
.....
- .3. **Linked Lists**
.....
- .4. **Trees**
.....
- .5. **Maps**
.....
- .6. **Binary Search Trees**
.....
- .7. **AVL Trees**
.....
- .8. **Hash Tables**
.....
- .9. **Priority Queues (Heaps)**
.....
